Education

PhD in Computer Vision and Robotics, École Normale Supérieure – PSL — Paris, France — *2021 - Present*

Master in Electrical Engineering (2nd Year), Erasmus - Technical University of Munich — Munich, Germany — *2016 - 2017*

Master in Electrical Engineering (1st Year), Technical University of Madrid — Madrid, Spain — *2015 - 2016*

Bachelor in Electrical Engineering, Technical University of Madrid — Madrid, Spain — *2011 - 2015*

Professional Experience

PhD Candidate — Paris, France

Inria, Willow Team — *Sep. 2021 - Present*

- Working on vision-and-language robotic manipulation research projects under the supervision of Cordelia Schmid and Ivan Laptev.
- Development of simulation environments and robot tools to enable Willow team real robot experimental research on a bimanual UR5 robotic platform.
- Collaborated with 2 engineers, 3 PhD students and 2 PostDocs.

Robotics & Computer Vision Research Engineer — Grenoble and Paris, France

Inria, Thoth Team & Willow Team — *Jul. 2019 – Jul. 2021*

- Worked on a research project about robotic obstacle representations based on point clouds for neural motion planning.
- Developed and published a highly cited new semantic segmentation framework based on ViT transformers (Segmenter).
- Systems administration, maintenance and installation of the GPU cluster (comprising 25 nodes and 66 GPUs), RAID storage system and desktop machines of the team.

Robotics Research Intern — Munich, Germany

German Aerospace Center — *Oct. 2017 – May 2018*

- Developed a multi-robot algorithm for exploration of physical processes based on Deep Reinforcement Learning using the Python modules: Numpy, OpenCV, Matplotlib and Pytorch.
- Validation of the algorithm on real robotic hardware (UAVs swarm) using ROS.
